

SmartVent Positive2

Overview

SmartVent Positive2 is a classic centralised positive pressure system that monitors temperature conditions in your home and at the incoming air source, to ensure that you are benefiting from improved air quality always circulating around your home. This proven SmartVent technology has been used reliably in thousands of New Zealand homes over many years. Additional features, such as heat transfer scheduler and heater functions to easily operate upgrades, are included as standard. Enter your preferred temperature into the easy to use, fully automated, controller and your system will ventilate your home, providing fresh clean air when you need it most. As a temperature and humidity based solution in winter, SmartVent Positive2 introduces air faster when warmer and slower when cooler. Temperature protection, set at a user adjustable 5°C default, ensures that continuous cold air is not introduced when the incoming air temperature is below the set temperature protection level. The flexible upgrade options allow users to customise the system to suit their individual needs.

SmartVent Positive2 Range

Home ventilation system suitable for most types of homes.

Model	Description	Order Code
SV01P2	1 system outlet (expandable to 3 max.) for homes up to 100m ²	FAN2023
