The Summer Feature seasonal add-on is an optional second air intake located under the eaves or at the gable end of the home (weatherproof grille maybe required). This feature provides an alternative air supply for use during summer months.

- When installed on the south side of the house it ensures the coolest possible air is used.
- If the house design prevents the installation of a Summer Feature Seasonal Add-On, there are alternative options for a second air source such as through roof kits. SmartVent have a full range of accessories available to assist.
