

Positive Pressure Systems Comfort Upgrades

Outdoor Air Supply

The outdoor supply kit is designed specifically for SV01 & SV02 systems when roof cavity air is not desirable.

The kit contains a fixed grille and duct.

OutDoor Air Supply DCT0319

Compatible with	1 Room	2 Rooms	DCT0319 Contents	Quantity
Positive Advance	-	FAN7520	150mm x 3m Insulated Duct R0.6	1
Positive 3	FAN1110	FAN1111	250:150mm Reducer	1
Positive +	FAN7280	FAN7281	150mm Fixed White Grille	1
Positive 2	FAN2023	FAN0939	Fixtures and Fittings	-
Positive	SV01P	SV02P		

Heat Transfer

The Heat Transfer add-on has a motorised damper that switches the air source from either the outside or roof cavity to instead draw air from the room where there is a heat source (usually a lounge) and transfer it to the bedrooms. This Comfort Add-On can also provide internal air circulation when roof cavity and/or outside temperatures are too cold. When installing a Heat Transfer Comfort Add-On, an adequate heat source is required that is capable of delivering enough excess heat to warm rooms it is transferred to, while remaining effective in the source room.

- It is important to point out that when Heat Transfer is activated, the system is not bringing in fresh air, so it's not ventilating the home. However the home is getting the benefit of transferring heat around the house (e.g. cold winter nights). It also shuts off the air supply back into the heat source room.

Note:

- Heat Transfer is recommended when there is a heat source that creates excess heat (i.e. wood fire or similar).
- A heat pump sized for the room it occupies may not be suitable for Heat Transfer.
- If planning to use a heat pump with Heat Transfer, first consult the heat pump installer/manufacturer.

1 & 2 Rooms Kit FAN2027

Compatible with	1 Room	2 Rooms	FAN2027 Contents	Quantity
Positive Advance	-	FAN7520	150mm x 3m Flexible Insulated Duct R0.6	1
Positive 3	FAN1110	FAN1111	200mm x 3m Flexible Insulated Duct R0.6	1
Positive +	FAN7280	FAN7281	150/150/200 T Branch Damper and Valve Assembly	1
Positive 2	FAN2023	FAN0939	200mm Diffuser White	1
Positive	SV01P	SV02P	Fixtures and Fittings	-

4 & 6 Rooms Kit (1 Branch) FAN2028

Compatible with	4 Rooms	FAN2028 Contents	Quantity
Positive Advance	FAN7521	200/200/200 T Branch Damper and Valve Assembly	1
Positive 3	FAN1112	200mm x 6m Flexible Insulated Duct R0.6	1
Positive +	FAN7282	200mm Diffuser White	1
Positive 2	FAN1057	Fixtures and Fittings	-
Positive	SV04P		

(Also compatible with Positive Advance 6 room kit for use on only one branch, if used in this setup, the system should be programmed for only one branch.)

6 Rooms Kit (2 Branch) FAN4438

Compatible with	6 Rooms	FAN4438 Contents	Quantity
Positive Advance	FAN7522	200mm x 6m Insulated Duct R0.6	2
Positive 3	FAN1113	150mm Barrel Damper	2
Positive +	FAN7283	200mm T Branch Damper	2
Positive 2	FAN1064	200mm Diffuser White	2
Positive	SV06P	Fixtures And Fittings	-

(Includes two sets: one for each branch of an SV06P/ SV06P3/SV06P2/SV06P+/SV06AD)

Positive Pressure Systems Comfort Upgrades

Tempering Heaters

- A Tempering Heater is a 1kW or 2kW element inline heater designed to take the chill off incoming air.
- Use when there are concerns about cold air or draughts and tempering the incoming air is desirable.
- Tempering heaters will not provide a home heating solution.
- Using a 1kW heater, the temperature of the introduced air can be raised by up to 8°C. The temperature of the home will not increase by this much.
- A SmartVent system with an inline tempering heater is not intended to be a substitute for an effective heating system in the home.
