# INSTALLATION INSTRUCTIONS

## LHT1135 ANTHRACITE 2x 3W LED Up/Down Light

The Simx Lighting Tarawera Up/Down Light is a contemporary design, high quality LED luminaire. Water and dustproof, it is rated for exposed exterior locations.

## TECHNICAL SPECIFICATIONS

Voltage 220-240V AC

Wattage 2 x 3W Lumens 450 lm

**LED Colour** Warm White 3000K

IP RatingIP65SafetyClass IMountingWall

**Construction** Powder Coated Aluminium / Tempered Glass

## **BEFORE YOU START**

#### Please read all the instructions prior to installation.

- The Tarawera light should be wired to its own light switch.
- Single cable installation only. Looping (IN/OUT) cabling may effect IP rating and therefore is not permitted.
- An earth connection must be used for electrical safety.
- For all locations, please check that the direction of the beam will not cause undue glare to neighbouring properties.

#### IMPORTANT

This product is suitable for use only with a supply voltage of 220-240V AC 50Hz.

All electrical work must be carried out in accordance with local and national electrical codes as applicable. We strongly recommend that this light fitting is installed by a registered electrician.

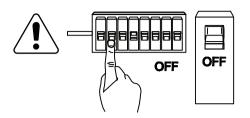

Always switch power off prior to installation. A means of mains power isolation must be installed in the circuit for the purpose of safe access for any internal cleaning, recalibration, or maintenance.

This light fitting is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Young children should be supervised to ensure that they do not play with the appliance.

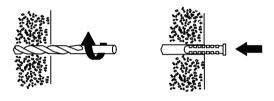

Any changes or modifications made or attempted to this product, without the prior written approval of the manufacturer, will void any and all stated warranties.

## **INSTALLATION**

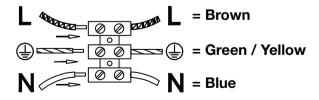

We strongly recommend this light fitting is installed by a registered electrician.

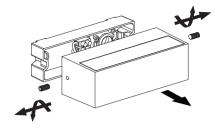

Switch off the power supply before commencing any electrical work.

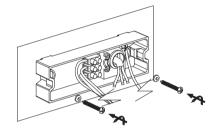

Drill the wall to depth of about 40mm and fit the wall plugs (if required). Care should be taken to avoid drilling or screwing into concealed electrical wiring/plumbing.

Wiring diagram.

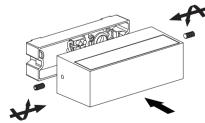

2 Unscrew the fixing cover screws with the allen key supplied and remove the rear mounting base.

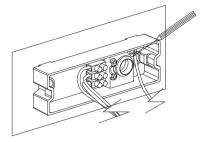

To retain IP rating, a single TPS 3-core flat cable must be used. Gaskets for both 1.00 and 1.5mm cables are included to select from. Pierce the gasket membrane with the power supply cable and draw the cable through.

Thread the rubber washers (supplied) onto suitable wall mounting screws and then affix the mounting base to the wall surface securely. The rubber washers are critical in preventing moisture ingress.

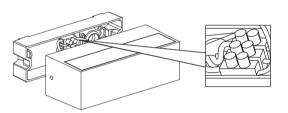

Reattach and securely screw the cover to the base. When installing in a location with an elevated acidic or saline atmosphere, manufacturer recommendation is to liberally coat the grub screws in petroleum jelly before reattaching. Ensure cables are not pinched when closing the unit.

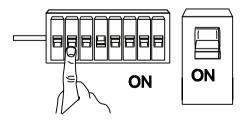

3 Use the rear base to mark the position of screw holes onto the mounting surface. Use a spirit level to ensure correct orientation.

6 Connect the power cables to the terminal block securely using the wiring diagram in Step 7.

9 Reconnect mains power and test circuit.

### PRODUCT COMPLIANCES

This product complies to all relevant standards and amendments.

#### MANUFACTURERS EXTENDED WARRANTY

This product is guaranteed by SIMX Ltd for 5 years from the date of purchase against faulty materials or workmanship which affects its designed ability to operate. During this period if the product has a defect of this nature it will be repaired or replaced free of charge by SIMX with the same item, or a similar one of higher specification.

#### ON CONDITION THAT:

The buyer returns it to the seller from whom it was bought, freight paid.

The product has been bought by the user (ie a receipt/sales invoice is produced as proof of purchase).

The product has not been misused or handled carelessly, installed in anyway contrary to the installation instructions, used on a supply voltage other than that indicated in the product specifications, or installed in any unusually exposed or harsh environmental conditions.

This guarantee excludes liability for discolouration of paint or plastic, or any user serviceable parts. It does not confer any rights other than those expressly set out above and does not cover any claims for consequential loss or damage.

Our Goods come with guarantees that cannot be excluded under the New Zealand Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Goods repaired or replaced if the Goods fail to be of acceptable quality and the failure does not amount to a major failure.

Specifications are subject to change without notice
