

3-Speed Wireless Wall Controller  
and Mounting Bracket Included

Description	Order Code
125mm EC Contour Continuous Bathroom Room Fan	FAN7037
150mm EC Contour Continuous High Steam Fan	FAN7038

Thank you for purchasing this quality exhaust fan.

To ensure correct function and safety, please read all instructions before using the product and keep all instructions for future reference.

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electrical shock and personal injury.

**TECHNICAL DATA**

Order Code	Supply	Duct Size (mm)	Power (W)	Max. Fan Pressure (Pa)	Fan Performance						24/7 Specific Fan Power (W/l/s)	Sound Level dB(A)
					Boost		Run		Continuous			
					(l/s)	(m³/hr)	(l/s)	(m³/hr)	(l/s)	(m³/hr)		
Bathroom Fan FAN7037	220-240V~50Hz	125	3-24	20-116	68	245	55	200	26	93	0.12	28-37
High Steam Fan FAN7038		150	3-80	33-323	142	510	121	434	39	140	0.08	21-44

**Note:** Airflow data is in accordance with internationally recognised testing standards. Airflow may vary according to style of fascia used.

**DIMENSIONS (mm)**

**FAN INSTALLATION AND ELECTRICAL CONNECTION MUST  
BE CARRIED OUT BY A REGISTERED ELECTRICIAN**

## IMPORTANT

This fan unit must be installed by a registered electrician and its installation and connection to the power supply must comply with all current Australian and New Zealand electrical and building regulations including AS/NZS3000:2017, or latest edition thereof.

The power supply cable must be suitably rated by a registered electrician to satisfy the total load on that circuit.

## WARNING

1. This unit may only be used as recommended by the manufacturer in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock, or injury to persons. Contact the manufacturer, or local agent, if required.
2. Isolate the mains supply before making any electrical connections. This system should be installed by a registered electrician.
3. Ensure the unit is properly earthed.
4. The unit must be able to be isolated from the power by means of a disconnect switch meeting current electrical regulations.
5. The appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
6. Children should be supervised to ensure that they do not play with the appliance.
7. Do not use restrictive devices like barrel dampers with this fan as there is a safety feature that will switch the fan off if excessive back pressure is applied.

## IMPORTANT CONSIDERATIONS BEFORE INSTALLING

Planning can make a big difference to the installation time and your satisfaction with the operation of the unit.

1. This fan is to be installed so that the blades are more than 2.2m above the floor.
2. The unit must be mounted outside the shower cubicle.
3. For the exhaust fan to work efficiently, replacement air, of a volume equivalent to the air being extracted, must be able to enter the room. This air is usually drawn from under the door, or through a slightly open window. If the room is airtight, however, the fan will function poorly.
4. This unit is designed for installation into a flat ceiling only.
5. Before commencing any cutting, check in the ceiling space that there are no obstructions such as ceiling joists and that there is sufficient height clearance for the housing. Check that the electrical wiring can be routed from the wall switch to the mounting location.
6. If any of the fan supply cords are damaged, they must be replaced by the manufacturer, its service agent, or similarly qualified persons, in order to avoid possible damage to the fan motor or controller.
7. Exhaust fans may adversely affect the safe operation of appliances burning gas or other fuels (including those in other rooms) due to back flow of combustion gases. These gases can potentially result in carbon monoxide poisoning. After installation of an exhaust fan such as a partition fan or a duct fan the operation of open flued gas appliances should be tested by a competent person to ensure that back flow of combustion gases does not occur.
8. Any changes, or modifications, made, or attempted, to this product, without the prior written approval of the manufacturer, will void any, and all, stated warranties.
9. In a kitchen installation, do not install the fan any closer, laterally, than 2m from the cooktop. Visit the Manrose website for fan kit options best suited for lateral kitchen installations within 2m of a cooktop.

**BEFORE INSTALLING THE FAN, MAKE SURE YOU HAVE TURNED OFF THE MAIN ELECTRICITY SUPPLY.  
DO NOT TURN IT BACK ON UNTIL THE FAN IS FULLY INSTALLED AND READY TO USE.**

**ALL ELECTRICAL WORK MUST BE CARRIED OUT BY A REGISTERED ELECTRICIAN IN ACCORDANCE  
WITH THE LATEST WIRING RULES AS/NZS3000.**

**INSTALLATION**

**Note: A means for disconnection must be incorporated in the fixed wiring in accordance with the wiring rules.**

1. Check the fan is free to rotate.
2. Cut the hole for the fan using a template, making sure the area behind the intended position is free from impediments.
3. Product is supplied with lead and plug pre-fitted.
4. Plug into a socket outlet installed in the ceiling space adjacent to the fan. Secure fan body using the three (or four) swing fixing arms. Use philips head screw driving to firmly secure but do not over tighten.
5. The supplied 100mm to 125mm adapter for the EC Continuous Bathroom Fan, must be fitted to the spigot of the fan.
6. Ducting can be attached to the air outlet prior to installing into position.

**Note: A standard socket in the ceiling space must be installed by a registered electrician for the installation of this appliance.**

7. Plug in the fan so that it is ON and check for excessive vibration or noise.
8. If fan is running as desired, secure the fascia by squeezing the spring fasteners and insert into the slot in the fan body. Check that the fascia is secured firmly and closely to the fan body.

**Note: When installing with a square fascia, ensure it aligns with the walls. Refer to the interior marks on the EC Contour Fan for guidance.**

**Note: When installing the fan in a bathroom, the duct should decline downwards towards the outdoor at an angle of about 10 degrees.**

**WHEN INSTALLING WITH AN LED LIGHT FASCIA**

1. Remove the double-sided tape and attach the LED driver to the fan body. (See diag. 1)
2. Plug the Fan and LED driver into a socket outlet. Knock out the stamped tab in the motor body and feed the LED output connector through. (See diag. 2)
3. Secure fan body to the ceiling using the 3 clips and screw to tighten.
4. Connect the LED connector to the LED driver securely. (See diag. 3)
5. Push the LED cable connector back through the hole so the connectors are hidden in the ceiling cavity. (See diag. 4)

*Diagram 1*

*Attach the LED driver to the fan body as shown*

*Diagram 2*

*Pull through connector*

*Diagram 3*

*Connect connector to the LED driver*

*Diagram 4*

*Push LED connectors into ceiling*

**Note:** LED fascia and LED driver are replaceable. To replace – disconnect female and male connectors and replace new LED fascia or LED driver.

**Note:** To avoid overheating DO NOT cover the LED driver with roof insulation.

**Note:** For Fascias with Tri-colour LED, set the switch on driver to desired colour temperature prior to installation.

**Driver**

**Switch (CW/NW/WW)**

Cool White/Neutral White/Warm White

6. Secure the fascia by squeezing the fastening springs and insert into the slots in the fan body. Check that the fascia is secured firmly and is sitting closely to fan body.

**Note:** Switch the fan on and check for excessive vibration or abnormal noise before installing the fascia.

Note: To change the colour on the Tri-Colour LED models, the switch is located on the driver.

WW = Warm White 3000K

NW = Natural White 4000K

CW = Cool White 6000K

**WIRELESS WALL CONTROLLER MOUNTING AND OPERATION**

1. Install 2x AAA batteries in the wall controller.
2. Screw the supplied wireless wall controller mounting bracket to the wall and clip the controller into the place.

3. **Boost** Set the fan to run at BOOST speed for **10 minutes**, after which it will automatically switch to 24/7 mode (continuous run at low speed).
4. **Run** Set the fan to run at RUN speed for **20 minutes**, after which it will automatically switch to 24/7 mode (continuous run at low speed).
5. **24/7** Set the fan to run continuously at **low speed**, and it will stop only when a circuit isolation switch is turned off.

**NOTE: Being a continuous exhaust ventilation fan the product should be wired or plugged in for continuous supply. The fan can be turned ON/OFF by the wall (isolation switch (not included)).**

**When first turned on, the fan will operate at the Normal (RUN) speed for 20 minutes, after which it will automatically switch to 24/7 mode (continuous run at low speed).**

The wireless wall controller comes factory paired with the fans receiver.

In the event that you need to pair another wall controller (i.e. replacement, or control of multiple fans with one controller) please follow the steps below.

1. Turn "OFF" main isolation switch (for at least 10 seconds)
2. Turn "ON" main isolation switch and within 3 seconds press the "BOOST" button on the controller.
3. A " tick tack" sound will be heard indicating that pairing is successful.

**NOTE: repeating the pairing operation 3 times will clear the cached data of the previously paired wireless wall controller.**

x2 AAA batteries included

**NOTE: Use good quality Lithium batteries to extend time between battery changes.**

Indicator light will flash RED when battery charge falls below 20%.

**BEFORE REPAIRING THE FAN, MAKE SURE YOU HAVE TURNED OFF THE MAIN ELECTRICITY**

## MAINTENANCE CAUTIONS

1. Make sure the fan is always switched off before cleaning.
2. Make sure to use the fan with the specified voltage as stated on the rating sticker.
3. Never immerse any part of the fan in water or other liquids.
4. Never use flammable solvent for cleaning the fan.
5. Never allow water to contact the electrical parts such as switch and motor.
6. Never immerse blades or other resin parts in hot water over 60 °C.
7. Never install the fan under extreme hot environments.

## CLEANING, STORAGE AND DISPOSAL

Before cleaning, turn the unit off, cut off the power supply from electrical outlet and wait for the unit to cool down.

- To clean the unit, use a soft cloth to wipe off any dust.
- Do not try to open the unit without a registered electrician. Improperly installed units can be dangerous.
- This product is in accordance with the relevant safety requirements. Repairs should only be carried out by registered electricians using original spare parts.

If you do not plan to use the fan for extended periods of time, it is recommended that it is cleaned and stored (preferably in its original packaging) in a cool, dry place.

Do not dispose of electrical products with household waste. Please check with your local council for advice on disposal or recycling. If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being.

# Simx Warranty Information

In this warranty:

We means Simx;

You means the consumer of the Goods

Supplier means the authorised distributor or retailer that sold you the Goods in New Zealand or Australia;

and Goods means the Simx product accompanied by this warranty and purchased in New Zealand or Australia.

The benefits provided to you under the following warranty are in addition to any other rights and remedies available to you under the law:

1. If, during the time from the date of purchase (Warranty Period), there is a defect in the Goods due to improper workmanship or material, we will replace or repair the Goods without charge. Any replacement product is warranted only for the time remaining on the original Warranty Period.
2. We are not obliged to replace or repair the Goods under clause 1 if the Goods have been improperly stored, installed, connected, used, operated, repaired, damaged, abused, tampered with, altered (without our written approval), or not maintained in accordance with our recommended installation, connection and operating instructions.
3. We exclude liability for:
  - a) consequential loss or any other loss or damage caused to property or persons arising from any cause whatsoever;
  - b) damage to consumable items such as lamps and starters; and
  - c) damage arising from normal wear and tear.
4. In order to claim under this warranty you must, within the Warranty Period, return the Goods to the Supplier, together with the original proof of purchase including the details below:

Supplier Name \_\_\_\_\_

Date of Purchase \_\_\_\_\_

Model Number \_\_\_\_\_

Invoice/Receipt No. \_\_\_\_\_

5. This warranty does not cover the cost of claiming under the warranty or transporting the Goods to and from the Supplier.

Our Goods come with guarantees that cannot be excluded under the New Zealand and Australian Consumer Law.

You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the Goods repaired or replaced if the Goods fail to be of acceptable quality and the failure does not amount to a major failure.

To speak to someone about your Simx product or claiming under this warranty, please contact:

Simx Ltd New Zealand
