

ACTUATOR 1x 8A DALI-2

Item number	GTIN
EP10427398	4015120427398

Product description

DALI-2 ACTUATOR with a relay contact that can be controlled via the DALI bus. Loads without DALI compatibility can be integrated into the DALI line and switched on and off via the DALI-2 control unit. Targeted switching in voltage zero crossing protects the switch contact and ensures a long service life.

Technical data

GENERAL	
Device category	Actuator
User interface	DALI-Bus
Conformity	CE, RoHS, WEEE, EAC
Warranty	3 years
ATTACHMENT	
Installation position	Box
Type of connection	Push terminal
Connectable wire cross section	0.75 - 1.5 mm ²
HOUSING	
Dimensions	Length 59 mm x Width 33 mm x Height/Depth 15 mm
Weight	18 g
Material	ABS
Protection type	IP20

Permissible ambient temperature	-20 °C...+60 °C
Colour	light grey

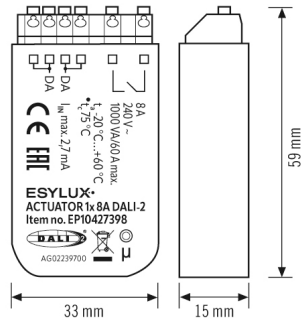

ELECTRICAL VERSION	
Control system	DALI-2
Protection class	II
In-rush current	60 A
No load current DALI	3 mA
Peak current DALI	8 mA
Power consumption	3 mA

AUTOMATION	
Bus voltage	DALI BUS
Min. switching capacity	240V ~ / 50Hz 1000VA / 8A

ACTUATOR 1x 8A DALI-2

Item number	GTIN
EP10427398	4015120427398

Dimension drawing

Detailed product description

- DALI-2 ACTUATOR with integrated relay contact for DALI-2 commands in accordance with IEC 62386-208 (DALI device type 7, DT7)
- The DALI-2 ACTUATOR is used to integrate loads without a DALI input into the DALI line
- The functionality is specified via the DALI-2 control unit used.
- Switching on is relay-protected in voltage zero crossing (zero-cross switching)
- Power is supplied via the DALI bus, an additional power supply is not required
